PROFESSIONAL SUMMARY

Software Engineer with 3+ years of full stack experience building scalable web applications across CRM, ERP, HRM, and Healthcare domains. Proficient in the MERN stack with hands-on exposure to Laravel and .NET backend ecosystems. Skilled in modular frontend architecture, RESTful API development, and delivering production-grade platforms. Focused on building performant, maintainable, and scalable web systems.

TECHNICAL SKILLS

Frontend Technologies: React.js, TypeScript, JavaScript (ES6+), HTML, CSS, Redux, Zustand
UI & Styling: Tailwind CSS, Material UI, Chakra UI, Bootstrap, React Bootstrap, Responsive Design
Backend & APIs: Node.js, Express.js, REST APIs, WebSockets, Webhook Integration
Databases: MongoDB, Mongoose
Authentication & Security: JWT, RBAC, OAuth, bcrypt, Secure Token Management
Tools & DevOps: Git, Bitbucket, JIRA, Postman, Swagger, CI/CD
Testing: Jest, React Testing Library
IDEs & Editors: VS Code, Cursor, Antigravity
Security & Code Quality: SonarQube, OWASP ZAP, Burp Suite

WORK EXPERIENCE

Software Engineer May 2024 – Present

Direct Axis Technology | UL Cyberpark, Kozhikode, Kerala

- Led full stack architecture and development of scalable CRM, ERP, and HRM platforms, reducing duplicate component logic by introducing reusable component patterns
- Contributed to architectural decisions including state management strategy, component design standards, and API integration patterns
- Built and consumed RESTful APIs using Node.js and Express.js, collaborating closely with backend teams on Laravel and .NET services
- Improved development efficiency by standardizing shared component patterns across modules
- Improved page load performance by optimizing component rendering and state updates
- Led pull request reviews, enforcing code quality standards across a team of 5+ developers in a Laravel & Inertia.js ecosystem

Software Engineer Jun 2023 – Apr 2024

Kaizen Star Technologies | Infopark, Kochi, Kerala

- Worked on full stack development for Medicoplus Hospital Management System covering patient management, billing, and consultation workflows
- Built and integrated REST APIs using Node.js and Express.js for patient records, billing, and insurance modules
- Collaborated with .NET (C#) backend services, integrating APIs into React-based frontend modules
- Improved application responsiveness by optimizing rendering logic, state management, and API data flow

Junior MERN Stack Developer Nov 2022 – May 2023

Soften Technologies | Kochi, Kerala

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js stack
- Built reusable frontend components and integrated secure REST APIs with JWT authentication

KEY PROJECTS

Real-Time Chat Application

React (Vite), Node.js, Express, Socket.io, JWT, MongoDB

- Built full-stack real-time chat supporting concurrent users with low-latency delivery via WebSocket communication
- Implemented JWT authentication with RBAC and bcrypt password hashing for enterprise-grade security
- Optimized state management and socket lifecycle handling, reducing memory leaks and unnecessary re-renders

Movie Mate – Ticket Booking Platform

React, Node.js, Express, MongoDB, Stripe

- Built user and admin modules with secure Stripe payment integration and webhook-based validation
- Implemented Redux-based cart management with lazy loading optimization

EDUCATION

Bachelor of Science in Physics Jun 2019 – Apr 2022

Sreenarayana Arts & Science College, MG University

MERN Stack Certification May 2022 – Oct 2022

Soften Technologies
