PROFESSIONAL SUMMARY

Software Engineer with 3+ years of full stack development experience building production-grade web applications across enterprise domains including CRM, ERP, HRM, and Healthcare. Proficient in the MERN stack (MongoDB, Express.js, React.js, Node.js) with strong expertise in modular frontend architecture, RESTful API design and integration, and structured state management using Redux and Zustand. Experienced in delivering end-to-end features across complex business workflows, collaborating with cross-functional teams, and working within Dockerized production environments. Additional exposure to Laravel and .NET (C#) backend ecosystems. Committed to building scalable, maintainable, and performant web systems with a strong emphasis on code quality and reusability.

TECHNICAL SKILLS

Frontend Technologies: React.js, TypeScript, JavaScript (ES6+), HTML, CSS, Redux, Zustand

UI & Styling: Tailwind CSS, Material UI, Chakra UI, Bootstrap, React Bootstrap, Responsive Design

Backend & APIs: Node.js, Express.js, REST APIs, WebSockets, Socket.io, Webhooks

Databases & ORMs: MongoDB, MySQL, Mongoose, Prisma, Redis

Authentication & Security: JWT, RBAC, OAuth, bcrypt, Secure Token Management

Tools & DevOps: Git, Bitbucket, JIRA, Postman, Swagger, CI/CD, GitHub Actions, Docker

Testing: Jest, Vitest, React Testing Library

Developer Tools: VS Code, Cursor

Security & Code Quality: SonarQube

WORK EXPERIENCE

Software Engineer

May 2024 – Present

Direct Axis Technology | UL Cyberpark, Kozhikode, Kerala

- Contributed to frontend architecture and led full stack implementation of scalable enterprise platforms — CRM (Node.js, Express.js, Prisma, MySQL), ERP (Laravel, PHP, MySQL), and HRM (Laravel, PHP, MySQL) — establishing reusable component patterns that significantly reduced duplication
- Architected a comprehensive reusable UI component library — forms, data tables, advanced filters, modals, and workflow-driven interface elements — enabling consistent user experiences across all enterprise modules
- Built and consumed RESTful APIs using Node.js and Express.js for the CRM platform, collaborating closely with backend teams on data contracts, business logic, and integration patterns
- Implemented structured Redux state management for user context, role-based permissions, and complex cross-module business workflows, ensuring predictable data flow across large-scale applications
- Worked within a Dockerized development and deployment environment utilizing Redis as part of the application infrastructure stack
- Led pull request reviews and enforced code quality standards for a team of 5+ developers in a Laravel & Inertia.js ecosystem, mentoring junior developers on architectural best practices
- Partnered with backend and product teams to review API contracts, data schemas, and business logic, ensuring seamless full stack integration

Software Engineer

Jun 2023 – Apr 2024

Kaizen Star Technologies | Infopark, Kochi, Kerala

- Worked on full stack development for Medicoplus, a production-grade Hospital Management System covering patient lifecycle management, consultation scheduling, billing, and insurance processing
- Integrated REST APIs for patient records, billing, and insurance modules while collaborating with .NET (C#) backend services, handling data validation and error states on the frontend
- Collaborated with .NET (C#) backend services, integrating complex healthcare APIs into React frontend modules with robust error handling and user feedback mechanisms
- Optimized component rendering logic, state management, and API data flow to significantly improve responsiveness across high-traffic healthcare modules

Junior MERN Stack Developer

Nov 2022 – May 2023

Soften Technologies | Kochi, Kerala

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js, contributing across both frontend and backend layers
- Built reusable, modular React components integrated with secure backend APIs using JWT-based authentication and protected routing patterns
- Participated in agile development workflows, collaborating with senior developers to deliver features within sprint timelines

EDUCATION

Bachelor of Science in Physics

Jun 2019 – Apr 2022

Sreenarayana Arts & Science College, MG University

CERTIFICATION

MERN Stack Certification

Soften Technologies, Kochi, Kerala

May 2022 – Oct 2022

KEY PROJECTS

Enterprise CRM System

React.js, TypeScript, Redux, MySQL, Prisma, REST APIs, Docker, Redis

Production-grade CRM platform supporting lead management, opportunity tracking, and customer lifecycle management.

- Architected a reusable UI component library covering forms, data tables, filters, modals, and workflow-driven components used consistently across all CRM modules
- Built and integrated backend APIs via Node.js and Express.js, collaborating with backend teams on business logic and data contracts in a Dockerized environment

Enterprise ERP Platform

React.js, TypeScript, Redux, Laravel, MySQL, REST APIs, Docker, Redis

ERP platform supporting operational workflows, master data management, reporting, and business process automation.

- Developed modular frontend architecture supporting scalable operational workflows and dynamic reporting across the ERP ecosystem
- Integrated ERP processes with Laravel backend through structured REST APIs ensuring reliable data consistency across all modules

HRM Management System

React.js, TypeScript, Redux, Laravel, REST APIs, Docker, Redis

HR platform supporting employee management, attendance tracking, and organizational administration.

- Built reusable interfaces for employee records, attendance, leave management, and multi-role administrative workflows
- Implemented RBAC and structured Redux state management with full REST API integration across all HR modules

Medicoplus – Hospital Management System

React.js, JavaScript, Redux, .NET (C#), REST APIs

Production-grade healthcare platform supporting consultation workflows, patient records, billing, and operational modules.

- Designed and built the Consultation module enabling patient scheduling, doctor assignment, and real-time status tracking
- Integrated billing, insurance, and patient record APIs from the .NET backend with robust validation and error handling

Movie Mate – Ticket Booking Platform

React, Node.js, Express, MongoDB, Stripe, Redux

Full-stack ticket booking platform with user and admin modules, Stripe integration, and webhook-based order validation.

- Integrated Stripe payment gateway with Node.js webhook-based order validation for secure and reliable booking confirmation flows
- Implemented Redux cart and booking state management with lazy loading for optimized performance under concurrent usage

Real-Time Chat Application

React (Vite), Node.js, Express, Socket.io, JWT, MongoDB

Full-stack real-time messaging application supporting concurrent users with low-latency WebSocket communication.

- Built a real-time chat system using Socket.io and Node.js enabling persistent WebSocket connections for low-latency message delivery
- Implemented JWT authentication with RBAC and bcrypt password hashing securing user sessions and room-level access control
